DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 09 June 2023 at 05:41 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels will be generally Low across the UK today, with pockets of Moderate levels developing across southwest England and Wales, due to the warm and mostly sunny conditions. Chance of the odd shower in these areas later in the day.

Tomorrow: Air pollution levels will be Moderate across England and Wales on Saturday, due to the very warm or locally hot conditions. Generally Low elsewhere, with pockets of Moderate likely.

Outlook: Air pollution levels likely to remain at Moderate levels due to the very warm, locally hot and humid conditions persisting into early next week. Scattered showers and thunderstorms reducing levels in places.
